Comments entered:

I am writing to comment on Proposed Rulemaking: Safe Drinking Water PFAS MCL Rule (#7-569). Many uses of PFAS could be phased out. There are available substitutes for cookware with PFAS; as a home cook, I prefer some of the ceramic nonstick pans. The May 2022 issue of Consumer Reports has a story about PFAS in food wrappers and current efforts by restaurants and other states to eliminate them. To protect our health, I hope the legislature will enact strict protective standards for drinking water, and include individual water wells. Thank you.

No attachments were included as part of this comment.
