

Form Letter H: "Greatest Protection from PFAS"

Proposed Rulemaking: Safe Drinking Water PFAS MCL Rule (#7-569)

Thank you for taking action to help address the major exposure route of PFAS in Pennsylvania.

I encourage you to make sure the proposed MCL for PFAS:

- Applies to BOTH public and private water wells.
- Implements more protective standards by making the PFOA MCL as low as possible but not to exceed 6 ppt, the PFOS MCL no greater than 5 ppt and the combined concentration of PFOA and PFOS no higher than 13 ng/L.
- Expands the compounds covered to include PFNA, PFHxA, PFHxS, PFHpA, and PFBS.
- Does away with monitoring delays by requiring all systems to start sampling immediately.
- Requires annual sampling for all systems with no waivers.

Please address my concerns to ensure we get greatest protection that can be attained from exposure to PFAS compounds.

Thank you.
