I am writing to oppose a regulatory change that could see mass discrimination against unvaccinated children and adults.

This regulation would expand Covid-era infringements on constitutional liberties by applying them to a longer list of diseases without the emergency-declaration limits voters approved in 2021. These proposals will not prevent community transmission of diseases that have been circulating for centuries. Instead, the proposals expand surveillance, restrictions, micro-lockdowns, and coercion.

Just watch the news and Senate hearings, the covid era of fraud manipulation and unwarranted government control is over.

Margie Kiesel
