To whom it may concern;

I am writing today as a resident of Pennsylvania to strongly oppose the proposed regulation changes in regard to Regulation #10-242: Communicable and Noncommunicable Diseases.

This is just a blatant attempt by Governor Shapiro to disregard the will of the people who on May 18th 2021 voted on and passed two constitutional amendments limiting the emergency powers of the Governor through the Department of Health. By expanding the power of the Department of Health, through this legislation, the Governor is cementing his ability to circumvent the Constitution and impose tyrannical restrictions on the people of Pennsylvania.

This legislation would go against HIPPA and release personal health information to the government or whomever the Governor deems necessary.

It would give the Department of Health unrestricted access to anywhere they deem necessary to conduct their business without a warrant, in direct violation of the 4th Amendment.

It would permit forced vaccinations and forced mask wearing again. Did we not learn anything from COVID and the Fauci diaries?

Plus the terminology in the regulation is so vague as to give the Government, through the Department of Health, unrestricted power over almost anything health related.

After seeing how the government, through public health agencies, destroyed our freedoms during COVID, why would anyone consent to this type of power ever again? I'm not sure what Governor Shapiro is attempting to accomplish by pushing this, but I believe Pennsylvanians have had enough of this infringement of rights to last a lifetime.

This regulation should never be passed into law.
